

ABSTRACT OF THE DISCLOSURE

A light fixture for mounting a light and one or more electrical devices to either the ground or a structural surface. The light fixture includes an integral rectangular base assembly with a plurality of vertical framing members. A light transmitting tube is slidingly carried over the vertical framing members and a plurality of louver members are slidingly carried over the light transmitting tube. The light fixture provides a weatherproof enclosure for enclosing the light, the electrical devices, and all associated electrical wiring.
